

# Barton Square

*Lighting up Manchester*

Trafford Centre added the new, Barton Square development to its Christmas decoration wish list, in May.

Using the expertise of KD's sister company KD Access, positioning a five-metre tall Santa at the top of the 60m high Campanile as a focal point, was just the start.

Giant icicles, up to 10m in length, dripped from the Tower. And two, 30ft Christmas trees with 16,000 lights between them, illuminated the sky for miles around.

Clever use of LED lights - more efficient than traditional bulbs, much brighter and lasting almost three times as long - made Barton Square a brighter installation in more ways than one!
